REPORT OF TRUSTEES

—OF THE—

EAST MISSISSIPPI STATE INSANE ASYLUM.

To the Governor :

We respectfully submit the following report of the condition of said Asylum on December 1, 1889 :

In the discharge of our duties as trustees to whom has been committed the "charge of the general interests of the Asylum," we have endeavored to keep in view the ordinary comforts and wants of the unfortunate inmates of the institution, and the means at our disposal alike ; yet we are free to say that we have regarded the former as the higher and more sacred obligation. We can state, however, that we have, by rigid economy in expenditures been able to provide for the necessities of the patients, at least, without going largely in debt.

It will be seen by reference to the financial report hereto attached, that the outstanding indebtedness of the Board on December 1, 1889, is \$2,534.29. The indebtedness on December 1, 1887, was about the same, and was paid out of the appropriation for 1888, which left a similar deficit on December 1, 1888, which had to be paid out of the appropriation of 1889. So it will be seen that out of the appropriation for 1888-'89, which was over three thousand dollars less for each year than the appropriation for 1887, we were compelled to pay these overlapping debts, and even if the appropriation for these years had been sufficient to enable us to meet the current demands upon us, these debts could at best be only replaced by others. We respectfully suggest, in this connection, that provision should be made at an early day, either by a special appropriation, or by an increased appropriation for the year 1890, to pay off, not only this indebtedness, but for the necessary expenditures for the month of December, so that we may be able to commence the year out of debt. We estimate that five thousand dollars will be sufficient for these purposes. As it is, we have to pay bank rate of interest from thirty to ninety days on the debts due,

and on necessary purchases made from December 1, until an appropriation is made.

We venture to repeat what was said by the Board in the report of December 1, 1887: that the appropriation for the support of the Asylum for 1888-'89 was insufficient. We trust the incoming Legislature will see as we do, that the inmates of an Insane Asylum cannot be properly supported and cared for on the small appropriation made for the past two years. Let us see what the per capita cost is, and compare it with the cost of maintaining other Insane Asylums. The report of the Superintendent, December 1, 1887, shows the number of inmates to have been 230. On December 1, 1889, we find the number to be 249. Taking 240 as the average for 1888-'89, we find the per capita cost of maintaining (and this embraces the entire appropriation) or rather, the allowance for maintaining the inmates of the East Mississippi Insane Asylum to be \$132.23. Reference to a list of eighty Asylums in the United States appended to the report of Dr. Mitchell, Superintendent of the State Lunatic Asylum, for 1886-'87, will show that but two Asylums in the number show a smaller per capita cost, and one of those, (a colored Asylum) has over 400 patients, and the other over 600. The one most nearly approximating ours in the average number of patients spends, yearly, \$64 more than ours per capita. That is located in the State of Arkansas. It must be borne in mind that the State furnishes everything needed by the patients. With rare exceptions are patients furnished even with clothing from the outside.

The appropriation made by the last Legislature for repairs has enabled the Board to have much needed work done, but there yet remains much to be done, not only in the way of repairs, but in supplying new machinery, water and heating pipes, water tanks, etc., which are enumerated by the Superintendent in his report herewith submitted, and which we believe should be provided for.

The field and garden products (raised by hired labor) have contributed largely to the support and health of the Asylum, but the lands being poor and dry, and the small appropriation rendering the purchase of necessary fertilizers impracticable, the yields have not been as large as desired. A sufficient increase in the appropriation to justify the employment of a practical farmer, who could devote his whole time to the farm and garden, and for the employment of necessary labor and the purchase of fertilizers, would result in profit, as well as the production of ample supplies of wholesome vegetable food for the patients.

We commend the suggestions of the Superintendent in reference to the importance of provision for better milk

cows, additional mules, wagons, agricultural implements, etc.

We think the safety and health of the inmates of the Asylum demand that a better supply of water and a safer mode of lighting the Asylum should be provided. After the passage of the Act of March 10, 1888, constituting a Commission with authority to contract for water and electric, or gas lights for the humane and charitable institutions of the State, we called the attention of the Commission to the wants of the Institution under our care, but for some reason no action was taken so far as we are advised. It was suggested, however, by one or more members of the Commission, that the matter be submitted to the next Legislature. We sincerely trust some action will be taken looking to the removal, so far as possible, of every menace to the health and lives of the inmates of the East Mississippi Insane Asylum.

We repeat a recommendation made by the trustees in their report of December 1, 1887, in relation to the surplus lands of the Asylum. The Act of 1882, providing for the erection of the East Mississippi Insane Asylum, required the donation of not over four hundred acres of land. The city of Meridian purchased and donated to the State, for the use of the Asylum, about five hundred and fifty-six acres. While this land, and particularly that portion of it most remote from the Asylum, is of but little value for agricultural purposes, especially to the Asylum, it is very valuable, and in demand, for suburban building purposes, and if offered for sale would bring good prices. We think the sale of a portion of the land, say one hundred and sixty acres, most remote from the Asylum, and the use of the money obtained in needed improvements would be wise policy. We therefore recommend that the Legislature authorize the trustees to sell the number of acres suggested, or to exchange a portion of it for lands contiguous to the Asylum buildings, the proceeds of the sales to be used in the construction of a kitchen, chapel, laundry, etc., which are greatly needed.

We concur in the recommendations of the Superintendent in regard to changes in the laws in relation to Insane Asylums.

We think we are justified in reporting the Asylum in good condition, considering the many disadvantages under which the Superintendent and Trustees have had to labor. Rigid economy, and watchfulness of the comforts and wants of the unfortunate inmates committed to our charge, have been our aims, and we invite a close investigation and criticism of our official conduct.

We submit herewith the financial report of the Steward, who has been faithful and efficient in the discharge of his duties, and ever ready to assist the Trustees in the practice of economy. His bond is on file in the Auditor's office.

Respectfully submitted,

W. F. BROWN,
H. M. STREET,
GEO. S. COVERT,
JOHN STINSON,
S. B. WATTS,
Trustees.

REPORT OF SUPERINTENDENT.

EAST MISSISSIPPI INSANE ASYLUM, }
MERIDIAN, MISS., Dec. 1, 1889. }

To the Board of Trustees :

GENTLEMEN: In conformity with the requirements of law, I herewith present the report of the East Mississippi Insane Asylum, for the past two years of 1888 and 1889, being the third report, and fifth year, since the Asylum was opened for the reception of patients.

There has been admitted since its opening 645 patients, of which 361 were males, and 284 females. Table No. 15 of the report for 1889, will show the counties from which they came, with number from each.

By reference to Table No. 1 of this report for 1888, it will be seen that we had remaining at last report 230 patients.

Admitted during the year 76, making a total treated during the year of 306 patients; of this number we discharged 48; 10 eloped, and 34 died.

The elopements were principally among convalescents, who were nearly ready for discharge, who took advantage of the additional liberty allowed them.

During this year we had two epidemic outbreaks in the Asylum, first of dysentery, followed by typhoid fever. Of the first we had in all 98 cases. The disease made its appearance on the violent white female ward, from which it gradually spread until it was on every ward. Its presence was in the months of April and May, and was of a most aggravated form of the disease.

From this ward (where we had the most delicate and worn-down constitutions, coupled with patients laboring under conditions of intense maniacal excitement, and also quite a number of epileptics) we lost 7 patients, which constituted the mortality of this epidemic.

All diseases of a congestive or hemorrhagic form are intensified where the subject is an epileptic, and the mortality correspondingly greater.

Of the 645 patients admitted since opening the Asylum 122, or 19 per cent., were epileptics.

It will be seen by reference to Table No. 1, of this report for 1889, that we have remaining now 249 patients, of which 46, or 18 per cent., are epileptics.

In the epidemic of typhoid fever we lost 5 cases, of which 2 were epileptics.

Of the 138 deaths since the opening of the Asylum, five years ago, 46, or one-third of them were from epilepsy, a disease for which medical science knows no cure.

I have known but one rule in the admission of patients, that of having room for them; never refusing admittance as long as I had an empty bed or place to store them. Never inquiring what characted of case it was. Some living only a few hours, and others a few days after admission.

I instituted a most diligent search and investigation, to find, if possible, the cause for this outbreak of dysentery and typhoid fever. No leaking pipes or defective traps could be found. Failing in my search for a cause, I set to work to remedy the trouble.

I had barrels of bi-chloride of mercury solution made, with which the walls, floors, ceilings, and bedsteads were thoroughly sprayed, which acted magically in dispelling all disease from the house. From that time to the present, the entire household have enjoyed almost perfect immunity from any of the ordinary diseases of the country.

By an examination of table No. 14 for 1889, it will be seen that we have not only had a material reduction in our deaths, but the entire mortality for this year was due almost wholly to those conditions usually found in Insane Asylums.

The general health of the household at this time is very good, with a few exceptions.

The matter of the East Mississippi Insane Asylum not receiving patients upon "certificates of two physicians," seems not to be understood, while the Asylum at Jackson (both State institutions), admits on physician's certificate. I think it would be well for your Board to call attention to this, that if there be any ambiguity in the law, it may be made plain.

I think the lunacy laws of the State need revision in several particulars. Older States, such as New York, Pennsylvania and others are still amending their laws for the government of the insane. It is not likely that we have yet in our meager laws obtained the best enactments with reference to the insane. I think that medical testimony should be had in trials of all persons charged with insanity, that as full and comprehensive statements of cases as possible should be made by the physician or physicians, to accompany the patient as a part of the record, and a provision made for the payment of such expert testimony.

The Asylum has been in operation for five years, with but few repairs, and without refurnishing many things that would of necessity in that time wear out and require their substitution with new ones, of which the following are most needed, and pressing, viz :

The entire Asylum building needs the wood-work painted.

The cottages built in January, 1885, have never had even a priming. I think it would be economy to have them painted. It occurs to me that a salaried painter should be employed and paints purchased as needed.

Our bath-rooms and water-closets need new floors and some joists, having rotted from continued wetting. We need some additional inside wire screens for windows, finishing of clothes drops and some few additional door-locks. The carpenter tells me that some repairs are needed to the guttering on the house.

Our kitchens require two new ranges, one for the ward and one for the centre kitchen.

Our laundry will need two new "rotary washing machines," as those we have are about worn out and will not much longer do service. Also some repairs to "rinsing tubs."

Our boilers, two in number, twelve feet long, have never furnished the steam surface needed for properly heating the house in winter. We need two boilers, say 44 inches in diameter by 20 feet long; besides subserving our wants, they will economize coal.

We have three "Knowles pumps," which have been continuously at work for five years; they need repairing.

The chimney or smoke-stack to our boilers is made of thin iron and is fast rusting out, and will have to be replaced soon with one of iron or brick.

The roughly improvised cover or house over our engine, pumps and boilers, is fast rotting down, having been made of rough pine lumber. The machinery should be properly housed.

Our hot water tank in the dome of the building was made of very thin iron, and is fast rusting out; the chances are that it will not do duty more than a year longer, if so long; a new one should be had in its stead, of $\frac{3}{4}$ inch galvanized iron and have a copper coil inside; it will then last a generation or more.

Our plumbing, or piping, was never sufficiently large for the transmission of active steam to the building and radiators, and the water pipes were never sufficient to supply all the wards at one time; besides this, it is of a common quality and is so badly rusted, that it is frequently giving way, both in the water and steam pipes.

The entire house needs re-piping with larger pipes, and

they should be either galvanized, or composition metal to insure durability.

We are much in need of a carpenter shop and a full set of carpenter's tools.

In the anticipated change of the main sewer of the building, it will require not less than one-half mile of tiling, as some will be required at other points to take the storm water off at right angles with the main sewer.

The fencing around the grounds, garden and orchard, was put up of pine, much of it sap; it is rotting and blowing down, showing the necessity in the next year for a new fence; besides this there are other portions of the land that requires fencing to protect the crops from destruction by outside stock.

Our Cemetery should by all means have a fence around it and neat head-boards should mark the graves of all buried therein.

One of the *essential* needs of the institution is a plentiful supply of milk. We should have daily forty or fifty gallons. A sufficient number of good milk-giving cows should be purchased to insure the quantity, and a competent milkman employed to milk and care for them, and a nice milk house should be erected, remote from our stables; their present quarters could be used for dry cattle.

Our farm needs four good heavy mules, one four-horse and one two-horse wagon. We need some farming implements, among which should be a mowing machine.

We need a pair of horses for our ambulance. Since the first furnishing of the Asylum the centre building has not been refurnished with anything; of necessity in that time many things are worn out that need replacing.

With reference to the matter of support for the Asylum, the last two years has demonstrated beyond a doubt, that the last appropriation was not sufficient, of which your board are fully aware. A thorough acquaintance with the sentiments and wishes of the people all over the State, makes me know that it is the wish of our people that the insane charities of the State shall have an appropriation commensurate with their needs.

The position of Superintendent places me in possession of the fact that there are many insane throughout the State and many in the jails of the counties, who need to be in the Asylum and for whom applications have been made for admission and refused for want of room, the largest proportion of which are among our negro population.

It is evident that additional Asylum room will be made for their care by our State Legislature. While others may possess a different idea, I am impressed, after a careful study

of the matter, that it would be wisdom on the part of our people to furnish another asylum for the negroes, and separate the races. I think, if properly located, upon alluvial land, and with a sufficient acreage, that the cost per capita, for their support will be materially lessened from year to year, until it will be almost, if not quite self-sustaining. Kept in asylums with the white race, there will, I am sure, never be any diminution in amount requisite for support.

There are now not less, I am sure, than 300 insane negroes in the State, and it would be economy to erect an Asylum with a capacity of 500 patients, and it has occurred to me that a memorial to the Congress of the United States in their behalf might insure an appropriation of an amount sufficient to erect the building and equip it, and an annuity for its support, or for a portion of it at least.

There are about 900 insane (black and white) in the State. The capacity of the two Asylums without crowding is 605, so it is apparent that the present Asylums would be very near full, if the negroes were separated from the whites, which would necessitate some addition to one of the present Asylums to accommodate increased numbers.

ACKNOWLEDGMENTS.

We are under obligations to the late Mr. Seraphine Spengler, of Vicksburg, Miss., for about 4,000 feet of heart cypress lumber, including two large gunwals, with which we constructed a nice pleasure boat for our artificial lake. The boat is 30 feet long by 12 feet wide, with top and railings all around. This generous donation was just before his death.

We acknowledge the reception of a package of Christmas cards from Mr. John Pierson, of New York City; they were quite a source of pleasure to the patients. His constant remembrance of the insane throughout the United States has stamped him a true philanthropist.

We are under renewed obligations to the Clarion-Ledger, Vicksburg Commercial-Herald, Columbus Dispatch, Aberdeen Weekly, Carthagenian, and Meridian Democrat, for weekly files. The perusal of which has been quite a treat to our patients.

We are indeed grateful to the following resident ministers for religious services during the past year, viz: Doctors Wechsler, Bozeman, Leavell, Andrews, Saunders, Crimes, Browne and Cody.

Since my last report the staff of the Asylum has remained unchanged, except that of Assistant Physician.

Dr. H. S. Gully, of Noxubee county, who has been with me for two years, has devoted himself faithfully to the duties of the office.

To the attendants and employees of the Institution I am thankful for faithful co-operation.

Together with statistical tables of the operations of the Asylum I append the report of the Matron.

As Insane Asylums are the outgrowth of a Christian enlightenment and civilization, we reverently invoke Divine aid in our labors.

Respectfully,

C. A. RICE, M. D.,
Superintendent.
